

Featherstrip Tapping Block

A block designed to aide in attaching cloth to the rails of all standard pool tables, Billiard tables, and Snooker tables.

This block is constructed of a wood that should withstand repeated hammer strikes with minimum denting.

One edge is contoured for easy hand holding.

As with any tool or construction aide, care needs to be taken to be sure that personal protection is suitable to the job, and that the job will not hurt the table rails that are being covered.

"Measure twice and cut once"
